# MINERALS.

 These minerals are catalogued by PROF. WM. NIVEN, an expert mineralogist, who deemed it advisable to quote the value of *each specimen in the lot*, except where "lot" is mentioned; giving a *low estimate in every instance*, as the only method whereby the distant bidder may get an idea of the value of the specimens without personal inspection. It must be borne in mind that the prices are *not limits*, and none of the lots are protected in any way; all to be sold *without reserve*.

The sizes quoted are in *inches*. ♦

### Miscellaneous Coins, Publications, Etc.

- 20 165 500 Base Silver Coins of various German States and cities: includes some  
early bracteates; with duplicates; poor to fine (10 pierced); 200 pes.  
1 500a — — Another lot, all dif.; fair to fine; average very good; 38 pes. This  
lot was returned to the Auctioneers who purchased it for some dealer  
(I know and care not whom) at my last sale; with the following re-  
marks on envelope: "Catalogued *all different only 21—1 Kreuzers*  
out of the 33. That's all!!" This "dealer" evidently lacks discrim-  
ination as he fails to note that the Kreuzers are from Bavaria, Wur-  
temberg, Hessen, etc., and are of different dates. Such a "dealer"  
would be liable to send you 1799 or 1804 U. S. Cents among Canada,  
Hong Kong or other *Cents*, as they would constitute no variety and  
and be only "Cents" to him. It is to be hoped the next buyer will  
know his business better, or at least be just to the cataloguer.

NOTE.—The Shells and Birds' Eggs following are to be sold in large lots, just as they chanced to be packed, regardless of rarity or value; each is carefully wrapped, and to divide these fine but fragile collections into smaller packages, would greatly increase the liability of breaking valuable specimens in shipment. Therefore it will richly repay any advanced collector to personally examine these lots when exposed for sale. No dealers' refuse or remnants will be found among them, but the accumulations of an experienced scientist of mature years.

- 506 12.50 705 **Shells:** Box 1: containing many rare and beautiful specimens of all colors, forms and sizes, from all parts of the world, land and sea. I merely mention fine shells of Felix Caesarea, Desertorum and Caffrea; a beautiful Euplecta Aspergyllum ("Venus' flower basket"), 9 in. long; total quantity 300 pcs.  
 " 8.00 706 — Box 2: average smaller than the preceding, but of greater variety; over 1,500 pcs.  
 " 8.25 706a — Box 3: still smaller; good lot; over 2,000 pcs.

NOTE.—The Eggs are all side blown, each carefully wrapped in cotton, with the data accompanying; very many were obtained from the Smithsonian Institute, which alone will account for the rare specimens from every clime, so seldom seen in the private collector's cabinet. They must be seen to be appreciated, as this catalogue cannot convey descriptions full enough to be of service to the reader. Mention will be made of a few that caught the eye in counting them :

- " 21.00 707 Eggs: Case 1: Swan, Herons, Marsh Wren, King Eider, Clapper Rails, Guillemots, Eagles, Hawks, etc. (25 unlabeled); 435 eggs.

 2.75 714 — Another glass case, larger: bronze-green, sapphire-head; with nest and eggs; beautifully mounted; 8x10.

The following Humming-Bird Skins were all obtained from the Smithsonian Institute, and each bears the original tag, giving the name and locality. THIS CATALOGUE IS SENT YOU BY  
DAVID PROSKEY, No. 448 RIVER STREET,  
PATERSON, N. J.,

Who will execute your orders free of charge (at his sales only ; all other auctions 10 per cent. commission). If you do not desire future catalogues of his sales, do not acknowledge the receipt of this, as he will not continue sending catalogues to parties who are not buyers, and he aims to distribute these catalogues only among *live collectors*. He also guarantees the descriptions herein ; as he has no intention or desire to deceive anyone, he therefore is responsible for any errors which may appear.

A number of consignments have been received for the sixth sale, which will follow this as soon as it can be prepared, and will contain Coins, Medals, Stamps etc. Parties wishing to dispose of their collections to the best advantage will find it to their interests to have them catalogued and sold by aforesaid D. Proskey, as his experience in matters of this kind has taught him the best methods for obtaining the greatest cash product from collections of any sort. The cost for selling is 25 per cent., which covers arranging, cataloguing, printing, distributing or mailing catalogues, attending orders, supervising the sale, and last, but most important, the *services of the best auctioneers in the U. S.*

Parties who think the cost (25 per cent.) too great, can have their sales made at isolated "Peter Funk" auction houses and towns, and goods catalogued in a careless manner in keeping with the process, for 10 per cent., but can be assured in advance that their goods would *not realize half* as much as if their sales were made through Bangs & Co. and properly catalogued.
